Subject: Update on Chesapeake

Hi Jeanne,

We had a call this afternoon with Gene Florentino of E&E and their in-house attorney, Colleen Mullaney-Westphall, that included myself, Susan Mravik and Stephen Hess. Afterwards, I called Chris Hill and passed along the information from our discussion. The important points are that:

- E&E's insurance cannot cover the drilling subcontractor, so we are removing the language they added to the access agreement stating it will in 6(c).
- We will amend the agreement in 6(a) to reflect that our prime contractor (E&E) will provide the insurance certificate with CHK named as an additional insured and with the subrogation language added.
- We will also include in that same section of the agreement that the drilling subcontractor will provide the same information as E&E before we begin work on drilling the site.
- We are reducing the coverage requirements back to \$10 million, the amount they had requested (they had bumped it up to \$15 million, which is what is on E&E's policy, but not necessary for the sub).
- We are looking into the cost of obtaining the insurance to regain control of the well.

- These insurance requirements are adding costs to our budget, and I will have to get approval from "up the chain" before we can commit to these changes.

(b) (5) and I will call him again Monday morning to update him on what we are finding out about the cost of the insurance.

I will be out of the office non-responsive on Thursday and Friday, back in on Monday. (b) (5)

Mike
